## Process Safety Pressure Protection Manager™ (PSPPM™)

This course will provide users with skills and tools necessary to complete a pressure relief and flare analysis in PSPPM. This course covers navigation, data entry, scenario and global scenario identification and required rate calculations, relief device sizing, disposal system component sizing and report generation. This course will also discuss PSPPM features and customization using built-in tools. Upon completion of this course, the student shall be able to:

- Independently navigate PSPPM
- Complete data entry in PSPPM
- Complete scenario identification
- Add calculation methods to applicable scenarios
- Relief device sizing

### Who should attend

This course is designed to offer focused training, networking, and best practice exchange during an interactive experience with PSPPM. This course is intended for personnel who will be utilizing or are evaluating PSPPM.

### Course duration

Two days

### Cost

\$1,600
