Ultra Plant Inspection of Piping and Equipment™ (UltraPIPE®)

This course will provide users with knowledge and skills to implement and utilize UltraPIPE for inspection data management, monitoring corrosion rate and remaining life, and scheduling activity and corrosion monitoring inspections in compliance with established inspection codes.

Upon completion of this course, the student shall be able to:

- Independently navigate UltraPIPE
- Complete data entry in UltraPIPE
- Import data from Excel
- Setup TMLs for corrosion monitoring and pressure T-Min calculations
- Create and assign inspection activities; complete, document and approve inspection activities
- Generate inspection schedules for corrosion monitoring and inspection activities
- Track equipment deficiency activities to resolution

Who should attend

This course is designed to offer focused training, networking, and best practice exchange during an interactive experience with UltraPIPE. This course is designed for personnel who will be utilizing or are evaluating UltraPIPE.

Course duration

Three days

Cost

\$2,025
